**Section 6. Worksite Self-Assessments.**

Prior to beginning his or her shift, and at each additional time prescribed by his or her department head, each city employee reporting for work shall conduct a worksite self-assessment for symptoms of COVID-19 or infection with SARS-CoV-2. Each self-assessment shall include a temperature check with a non-contact thermometer. If an employee registers a temperature of 100.4 or greater during a temperature check, or is experiencing symptoms of COVID-19 or infection with SARS-CoV-2, the employee shall immediately notify his or her supervisor and follow all instructions.

**Section 7. Returning to Work After COVID-19-Related Leave.**

City employees on leave pursuant to any of these interim leave policies may only return to work in compliance with these rules and the then-effective OSHA and CDC guidance for discontinuing COVID-19-related isolations if the guidance is more stringent. As of August 24, 2020, the following rules shall apply, unless modified by further administrative order or superseded:

**General Return-to-Work Rule:**

The decision to return to work should be made by the employee's department head, in consultation with the Personnel Department with notice to the City Manager, taking into account the context of the type of leave, the employee's illness and symptoms if any, and the general circumstances necessitating the employee's leave.

For situations where these rules, together with OSHA and CDC guidance, do not provide a clear date for an employee to return to work, the employee's department head should determine the employee's return to work date based on the totality of the circumstances

surrounding the employee's leave, erring in favor of protecting the City's general workforce from unintended viral transmissions.

*For Confirmed Symptomatic Cases of COVID-19:*

As applicable and in the city's discretion, the employee must meet one or both of the following return-to-work strategies:

**Symptom-based strategy:**

Persons with COVID-19 who have symptoms and were directed to care for themselves at home may seek permission to return to work under the following conditions:

- At least 3 days (72 hours) have passed since recovery defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms (e.g., cough, shortness of breath); and,
- At least 14 days have passed since symptoms first appeared.

**Test-based strategy:**

*(Test-based strategy is contingent on the commercial availability of ample testing supplies and laboratory capacity as well as convenient access to testing. Test results shall be acquired by the employee using the employee's resources and results should be released to the city for review.)*

Persons who have COVID-19 who have symptoms and were directed to care for themselves at home may seek permission to return to work under the following conditions:

- Resolution of fever without the use of fever-reducing medications and
- Improvement in respiratory symptoms (e.g., cough, shortness of breath), and

Persons with laboratory-confirmed COVID-19 who have not had any symptoms and were directed to care for themselves at home may seek to return to work under the following condition:

---

At least 14 days have passed since the date of the positive COVID-19 diagnostic test assuming no subsequently developed symptoms have occurred since. If symptoms developed, then the symptom-based or test-based strategy should be used.

*For Reasonably Suspected or Confirmed Cases of Illness Other than COVID-19:*

If COVID-19 has been medically ruled out and the employee has received a confirmed alternate diagnosis (i.e., influenza, &c.), the employee may seek to return to work based on the City's ordinary sick leave policy. *Alternatively*, where it is reasonable to believe the employee experienced symptoms of a common illness (i.e., the common cold, allergies, ear infections, &c.) and there are no complicating environmental factors, the employee may seek permission to return to work after at least 3 days (72 hours) have passed since recovery defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms (e.g., cough, shortness of breath), if any.

*For Unconfirmed Asymptomatic Cases and Quarantines:*

In unconfirmed asymptomatic cases and asymptomatic mandatory- or self-quarantine cases where the employee has not developed symptoms during leave, the employee may seek to return to work after the CDC- or FDOH-advised period of quarantine ends or fourteen (14) days have passed, whichever date is later.

**Section 8. Leave Balances.**

The City Manager may approve equitable adjustments to affected employees' Sick Time and Vacation Time leave balances based on policy changes to self-quarantine and asymptomatic leave situations in Emergency Administrative Order 2020-35.

- At home, follow food safety guidelines: clean, separate, cook, chill external icon. There is no evidence that food or food packaging has been linked to getting sick from COVID-19.

#### Accepting deliveries and takeout orders

- If possible, pay online or on the phone when you order.
- Accept deliveries without in-person contact whenever possible. Ask for deliveries to be left in a safe spot outside your house (such as your front porch or lobby), with no person-to-person interaction. Otherwise, stay at least 6 feet away from the delivery person.

- If possible, plan to order and pick up all your prescriptions at the same time.
- If possible, call prescription orders in ahead of time. Use drive-thru windows, curbside services (wait in your car until the prescription is ready), mail-order, or other delivery services. Do the same for pet medicine.
- Check with your doctor and pharmacist to see if you can get a larger supply of your medicines so you do not have to visit the pharmacy as often.

(f) During the Safer At Home period, the City of Bartow encourages all of its citizens to follow E.O. 20-91 and to mutually cooperate in the effort to alleviate the present situation by staying home, refraining from congregating in public places or upon the streets, and leaving home only when genuinely necessary.

**CITY OF BARTOW**  
**COVID-19 EMERGENCY ADMINISTRATIVE ORDERS**

**Order Title:** Fleet Vehicles and Pooled Equipment  
**Series No.:** Eleven  
**Subject:** Emergency Administrative Order Establishing Fleet Vehicle and Pooled Equipment Use Policy

**Original Order No. / Issue Date:** CM EAO 2020-30, July 20, 2020  
**Last Revised Order No. / Issue Date:** N/A  
**Expiration Date:** End of Local State of Civil Emergency or As Stated

---

According to the best information available to the City, coronavirus can survive for up to 72 hours on non-metallic surfaces before dying if surfaces are not cleaned. This order is issued and shall be effective for the duration of the Local State of Emergency to help slow and prevent transmissions of SARS-CoV-2 / COVID-19.

Drivers and operators of City of Bartow fleet vehicles have general responsibility of ensuring the safe operation of fleet assets, including the cleanliness of vehicle equipment, used at work. Users of common pooled tools and equipment have general responsibility for cleanliness of items. While all employees are responsible for compliance with this Emergency Administrative Order, drivers and operators shall have primary compliance responsibility for the cleanliness of fleet vehicles when in service and technicians shall have primary compliance responsibility for the cleanliness of tools and equipment when in service.

*Standard Procedures:*

Fleet vehicles operated by employees of the City of Bartow should be cleaned and disinfected using the following minimum guidelines and procedures:

- Frequently touched vehicle surfaces, such as the steering wheel, gear shifter, radio, armrest, power window buttons, and door handles should be wiped down with a sanitizer or disinfectant. At a minimum, frequently touched vehicle surfaces should be sanitized or disinfected at the beginning and end of each shift, however drivers are encouraged to sanitize commonly-used or shared-use surfaces multiple times a day.
- Cleaning and disinfection protocol should be followed consistently and correctly, which includes adequate ventilation for personnel when chemicals are in use.
- Doors and windows should remain open when cleaning the vehicle.
- When cleaning and disinfecting, individuals should wear disposable gloves compatible with the products being used as well as any other personal protective equipment (“PPE”) required according to the product manufacturer’s instructions.

**Order Title:** Fleet Vehicles and Pooled Equipment  
**Series No.:** Eleven  
**Subject:** Emergency Administrative Order Establishing Fleet Vehicle and Pooled Equipment Use Policy

---

- Equipment, such as handheld computers, scanners and toolboxes, and cart handles used to haul equipment, should be cleaned and sanitized at the beginning and end of each shift and at any time cleaning or sanitization appears necessary. Drivers and operators should be aware that chlorine- or ammonia-based cleaners may damage the interior dashboard and seats and take appropriate precautions to use correct cleansers and sanitizers. Additionally, ammonia-based cleaners may damage in-cab touch screen terminal displays.
- *Personal Hygiene:* Drivers should frequently sanitize their hands. Suggested times for use of sanitizer include each time before entering a vehicle and after the completion of each delivery or service call. Drivers should use respiratory etiquette, even if wearing a face covering, by covering a cough or sneeze with a tissue or sleeve to avoid expelling viral secretions on vehicle surfaces.

*Activity-Based Rules:*

**When transporting work crews:** “Social distancing” is the key to slowing the spread of the virus by breaking the chain of transmission. If there are two passengers (or more) in a vehicle, each will wear face coverings while inside the vehicle.

- The number of people in a vehicle should not exceed the number of doors
- Per CDC guidelines for multi-passenger vehicles, windows should be kept open when possible to provide ventilation.
- Managers should ensure that each passenger has an assigned door, window and seat. Do not switch seats throughout the day.
- Managers should assign crew members to the same vehicle daily. Crew members should sit in the same seat daily, as much as scheduling and attendance permits.

**When using pooled vehicles, tools and equipment:**

- Drivers of pooled vehicles and users of pooled tools and equipment must clean and wipe down every touched surface twice daily – first when entering the vehicle, obtaining a tool or checking out equipment and second, when the vehicle, tool, or equipment is returned to the pool.
- Pool managers are encouraged to assign specific vehicles, tools, and equipment to each crew to limit sharing and opportunities for unintended viral transmissions.
- Workers are discouraged from using other workers’ phones, desk, office, or other work tools and equipment when possible.

**Order Title:** Fleet Vehicles and Pooled Equipment  
**Series No.:** Eleven  
**Subject:** Emergency Administrative Order Establishing Fleet Vehicle and Pooled Equipment Use Policy

---

- Users of carts, dollies and service tools must clean and sanitize items before returning them.
- If tools or equipment are to be used by different employees within a 72-hour period, pool managers should ensure proper disinfectant procedures are in place to avoid unintended viral transmissions.
- Tool belts and other gear should be cleaned or disinfected following product label instructions.

**When refueling a vehicle:**

- Drivers should wipe down the fuel pump handle and keypad prior to inputting their odometer and driver ID. If wipes are not available, drivers should use disposable gloves or a paper towel to grab the fuel dispenser handle. Drivers should wipe down fuel keys, especially if shared. If drivers wear disposable gloves when refueling, drivers should dispose of them before re-entering the vehicle cab.

*Common Reminders:*

Pool managers should consider accelerating the frequency of replacing cabin air filters beyond OEM recommendations in frequently-used pool vehicles where deemed necessary and not contrary to the City's budget or public fiscal interest.

Cleaners are used to remove germs, dirt, and impurities from surfaces, but cleaning does not kill germs. By removing germs however, cleaning can lower the risk of infection. Disinfectants and sanitizers are used to kill germs on surfaces, however disinfecting does not necessarily clean dirty surfaces. It is recommended to use a cleaner, followed by a disinfectant, to lower the risk of infection as much as possible.

The *Health Insurance Portability and Accountability Act of 1996* (known as HIPAA) makes it a criminal act to divulge medical information without permission in certain circumstances. If you are informed that a fellow employee has tested positive for COVID-19 in your work area, let your supervisor and Human Resources know, follow any instructions you receive and clean any commonly-used vehicles, tools and equipment. Violating HIPAA regulations could legally comprise yourself and the City.
